

Product Data Sheet **S2110-19**

Fenlon™ Asta Low Friction Solid Lubricant

CONSTRUCTION

Product Code	2110-19
Weave Pattern	Satin
Fabric components	Nomex/PTFE
State	Adhesive Coated

TECHNICAL DATA

	Nominal Values			
Thread Count	105 X 67			
Thickness	0.020	inches	0.51	mm
Weight	1.85	oz/sq. ft	565	gsm
Width	12 - 48	inches	305 - 1219	mm

SHELF LIFE

≤ 40° F (4.4° C)	6 months from Manufacture Date
≤ 30° F (-1.11° C)	12 months from Manufacture Date
≤ 0° F (-17.77° C)	24 months from Manufacture Date

STORAGE & HANDLING

Resin and adhesive coated products should be handled with caution away from food. Gloves are not necessary as PPE. However, it is key to avoid contaminating the liner with oils, debris, etc.

Liners should be stored per the attached shelf-life guideline. It is acceptable to maintain a workable amount of material (1-2 weeks' demand) at ambient temperature.

Loomstate should be stored at ambient temperature, with an indefinite shelf life.
