

# TRANSFLEX™

Fenner Precision Fire Safe Polymers

Designed To Fit Your Needs. Exactly.

# TRANSFLEX™

Our new Transflex™ offers HL3 R1 compliant materials in a highly customisable format to suit your applications.

“ Helping you manage the complicated design tasks, so you can focus on success.

Why limit your design when with Transflex™ you can have:

- Custom thickness to suit your needs; exactly
- Custom colours to suit your customers livery
- Wide width formats to give less waste and fewer joints reducing your manufacturing costs by up to 25%
- Highly flexible materials, giving longer service life
- Wide Operating temperatures (-40 to 100C)
- World Wide Technical Support

Other specifications of the new Transflex include:

- Meets the Requirements HL3 R1
- Diverse range of surface finishes
- Proven Service Life
- Up to 1.6m wide

# WHY BUY FROM US?

Fenner Precision is a global engineered solutions leader, with a single-minded purpose: to provide world class, precision-engineered elastomeric solutions that help our customers succeed.

“ You need a company that is recognised for a certain way of helping our customers to succeed.

Our business is built on successful partnerships. By working closely with customers to understand their specific needs, the unique demands of their marketplace and by creating solutions that

work better for them, we enable new and better ways of working that drive improved efficiency and advance performance to new levels.

## Engineering Better Solutions

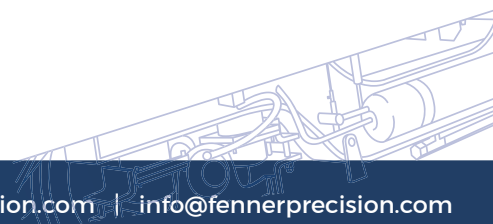

Beginning with a fast, efficient prototype development process, we tailor everything to meet your specific cost, timeline and operational requirements. Operating hand-in-hand with your engineering teams, we combine our elastomeric expertise with detailed knowledge of applications and functionality to specify the ideal solution for every project.

From aerospace and ATMs, to wind turbines and 3D printers, our materials technology is used to enhance a huge variety of applications around the world.

With manufacturing centres of excellence in Europe and North America, our technical expertise includes rubber, silicone and polyurethane, cured and uncured products, as well as coated and uncoated fabrics.

We make everything from belting and mouldings, to sheeting and seals. We have the scope to offer products in the right sizes, profiles and shapes, all with the specific heat resistance, stretch, strength and wear properties to fit your exact requirements.

“ It's all about enhancing the customer experience - doing things better, faster, and more reliably.

# LET'S TALK

We aim to make it as easy as possible for you to communicate with us.

Our door is always open and we have several ways to get in touch, with multilingual dedicated customer service teams in 3 locations. We look forward to speaking with you.
